Hyderabad, TS | 8143043869
manikantabalaga01@gmail.com

Summary

Aspiring web dev with 6 months' internship, driven to learn and passionate about intuitive UIs. Dedicated to front-end, eager to contribute to dynamic projects and grow with a collaborative team.

Employment History

AnuSolWave(Digi Impact) Pvt. Ltd. | Remote Trainee Software Engineer | 09/2023 - 03/2024

- Contributed to feature implementations in single-page applications including Safety Inspections, Rental Guardian, and Ex-CR-RS-App, using React, Redux, Saga, and libraries like Tailwind CSS, Material UI, and Formik libraries. These contributions enhanced overall performance and usability, demonstrating my proficiency in leveraging modern technologies to deliver impactful solutions.
- Played a pivotal role in developing similar single-page applications, including Safety Inspections, Rental Guardian, and Ex-CR-RS-App, each tailored to distinct business requirements. Key responsibilities encompassed the implementation of vital features such as sidebars, React table components, and robust user authentication systems. Additionally, contributed to the creation of reusable components to ensure application-wide consistency in design, themes, and spacings, thereby enhancing overall usability and user experience.

Projects

- Personal-Portfolio**

- Developed a Personal Portfolio application utilizing React, Tailwind CSS, Material UI, Framer Motion, and React Hook Form. Successfully deployed the application using Netlify, showcasing proficiency in modern web development technologies and deployment practices.

- Admin-Dashboard**

- Designed and developed an Admin Dashboard utilizing Redux, React Router DOM, Chart.js, Nivo Bar, FullCalendar, and Formik libraries. This project demonstrates expertise in state management, routing, data visualization, and form handling, enhancing user interaction and data management capabilities.
- Deployed the Admin Dashboard project seamlessly using Netlify, ensuring accessibility and availability for users. This deployment showcases proficiency not only in development but also in deployment processes, facilitating efficient project delivery and accessibility.
